

Complipath partner programme, on one page

Refer a client to Complipath. The client gets the normal plan at the normal price, and you earn a share of what they pay.

The partner programme, as on </partners/>

For	Consultants, lawyers, GDPR and DPO advisers and IT/MSP firms whose clients ask about the EU AI Act.
What you do	Refer a client with your partner link or code.
What the client gets	The normal plan at the normal price. Your code changes nothing on their plan or invoice.
What you earn	20% of what the referred customer pays for the first 12 months, paid monthly after the customer has paid.
Implementation and reseller	By agreement – talk to us.
On what	What the customer actually paid, excluding VAT, after discounts. An unpaid or refunded invoice counts zero; a yearly invoice counts a twelfth each month.
The 12 months	Counted from the month the customer's subscription began.
Refunds	A refund in a later month is taken back as a minus line in that month's statement. A cancellation takes nothing back; commission stops from the month the customer stops paying.
Tracking	Your link (app.complipath.io/signup?ref= and your code) sets a cookie, <code>cp_partner_ref</code> , on the app's sign-up page, holding only the code for up to 90 days. A code typed at sign-up counts too.
Which clients count	A client who signs up as a new workspace through your link or code. A workspace that already exists can be attached only by us, by hand, if it has no partner yet.
What Complipath is	EU AI Act compliance software: legal information, not legal advice. Rules decide. AI only drafts. A person confirms.
